

# HOW TO USE

## Super Detail Steps

1. Connect the power adapter into the small hole on the machine. Plug in the power.

2. Turn the dial clockwise to lower the cigarette holder. Or you can just press the holder down directly by finger

3. Press down the trough down. Insert an empty 0.31"/8mm diameter tobacco tube injector. Or add on the rolling paper

4. Turn the dial counter clockwise to lift up the cigarette holder; Just let the holder go if you are using finger at previous

5. Load the tobacco onto the hopper; Grinder tobacco small before rolling

6. Keep turning the dial counter clockwise if a tighter roll is

7. Press the switch to activate the device. Keep pressing to make the device running. Please be remind the switch only on one side

8. All down. You get an self-auto-rolled cigarette. You can push the cigarette back towards to make a tighter tobacco roll

8. Easy cleaning. You can use the brush to brush out the remaining tobacco. Have the device running without anything help clean the injector
