Tips:
In automatic mode, adjusting the roller will switch to manual adjustment mode.

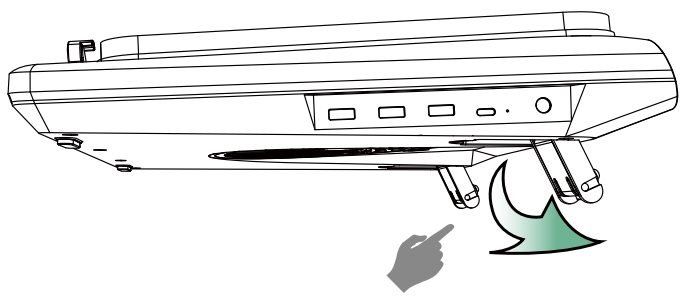

Manual Adjustment Usage Steps

1. Open the support feet and adjust them to the desired angle (this product has 3 height adjustment levels: flat, Level 1, and Level 2).

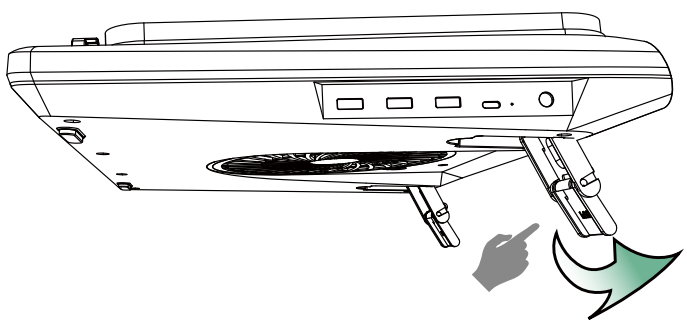

Flat

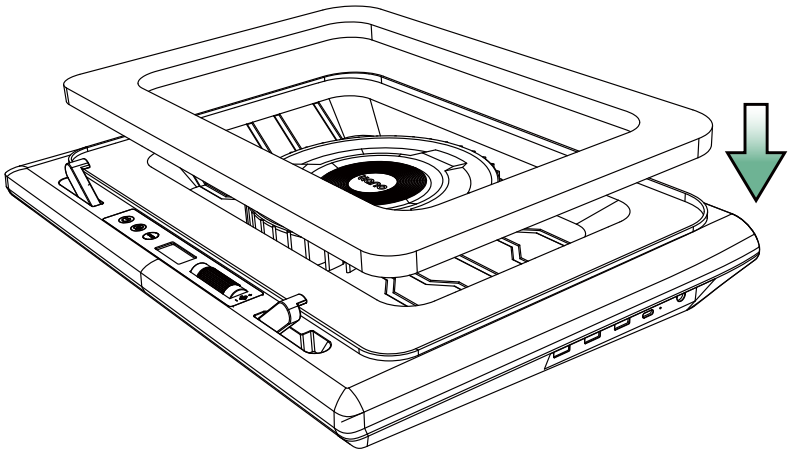

Level 1

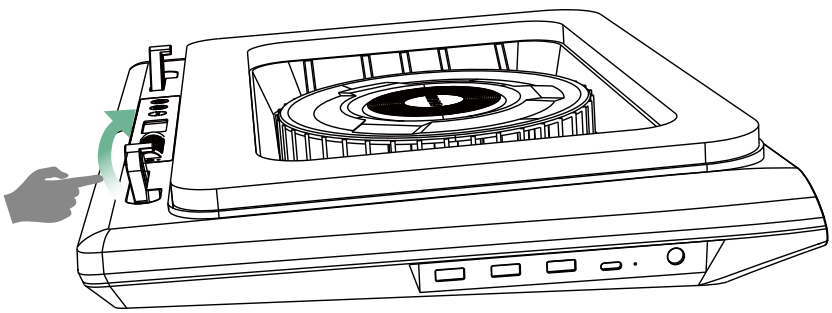

Level 2

2. Place the memory foam inside the frame.

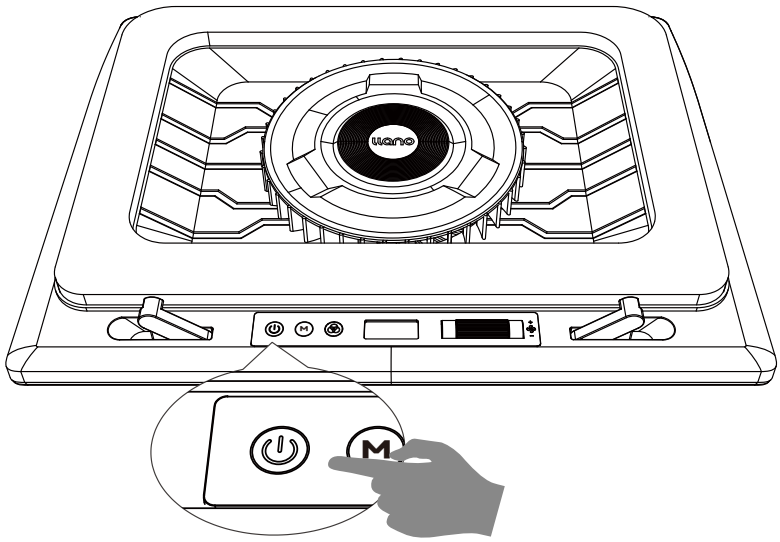

3. Open the two baffles.

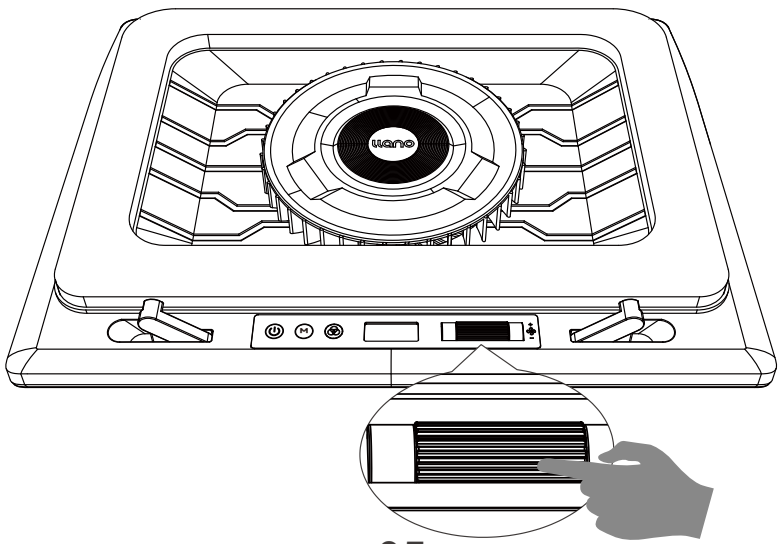

4. Place the laptop flat on the memory foam and secure it with the baffles.

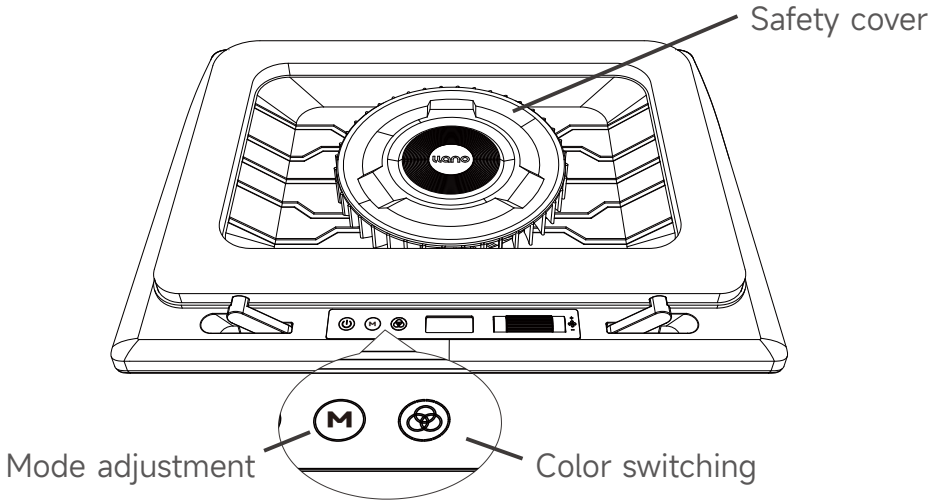

5. Connect the adapter to the laptop cooler, then long press the power button for 2 seconds to turn it on.

6. After turning it on, adjust the fan speed as needed(the fan speed is controlled by a roller: “+” increases the speed, “-” decreases the speed. The initial speed is 300 rpm, and it increases by 100 rpm per level, ranging from 300 to 2800 rpm).

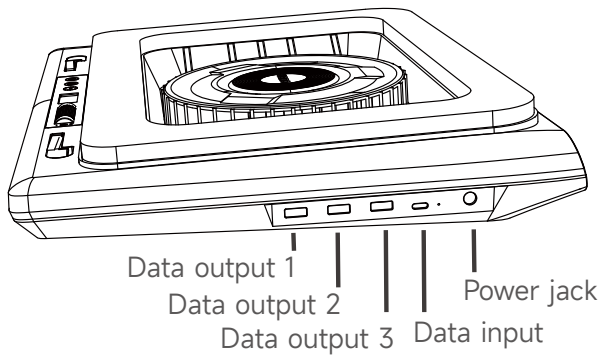

7. Adjust to the suitable RGB mode and color.
Click the “M” button to switch modes: single-color always on, single-color breathing, breathing gradient, and running light mode.
Click the button to switch colors: red, green, blue, purple, and orange. (Note: Color switching is not available in breathing gradient and running light modes.)
Long press the “M” button for 2 seconds to turn the lights on or off.
·This product’s lighting has a memory function. After powering on, it will restore the previous mode and color.

8.Long press the power button for 2 seconds to turn off the device.

9. Data Transfer
USB-C*1: Data input port
USB-A*3: Data output ports

10. Replace the dust filter

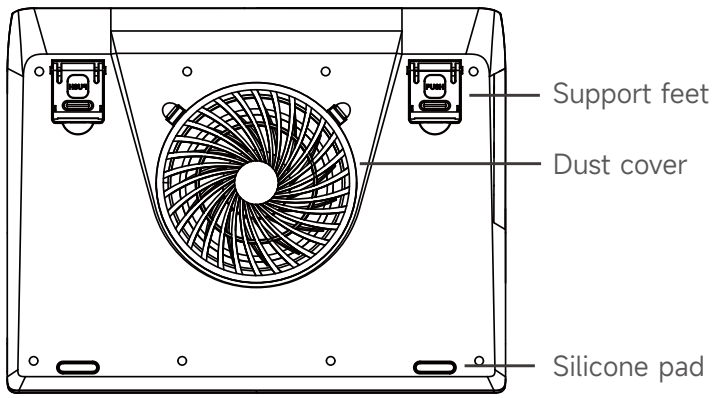

Open the dust cover.

Remove the dust filter.

Replace the dust filter.

Close the dust cover.

Note: It is recommended to replace the dust filter every 3-6 months, depending on your usage scenario and environment.
