

TUFT & NEEDLE®

Mint Hybrid Mattress

Our T&N Adaptive foam meets Micro Diamond memory foam and responsive, individually-wrapped springs for the ultimate motion control and pressure relief—all wrapped in an ultra-soft washable top cover.

Cool, comfortable sleep

Our breathable, open-cell T&N Adaptive foam, infused with graphite and ceramic cooling gel, combines with Micro Diamond memory foam to move heat away from your body, contour to your unique shape, and ensure you sleep in cool, pressure-relieving comfort.

Superior, steady support

Individually-wrapped springs provide our best motion control while Nanocoils offer personalized support and pressure relief. Plus, dense individually-wrapped springs along each border enhance edge support so you can get in and out of bed easily, stretch out, and sleep supported from corner to corner.

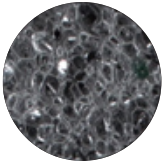

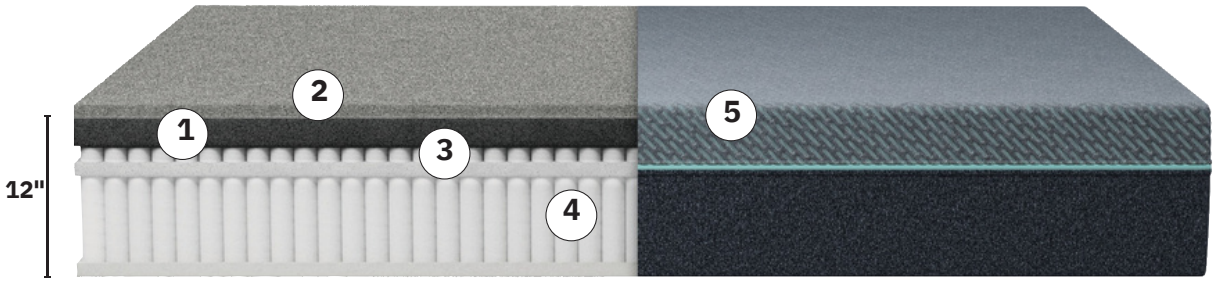

Easy-to-clean top cover

The Mint Hybrid has a plush, ultra-soft top cover that's breathable and removable—it zips off, so it's easy to throw in the wash to keep your bed fresh and clean.

TUFT&NEEDLE®

Mint Hybrid Mattress

Our T&N Adaptive foam meets Micro Diamond memory foam and responsive, individually-wrapped springs for the ultimate motion control and pressure relief—all wrapped in an ultra-soft washable top cover.

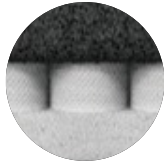

1. T&N Adaptive® foam

With graphite and ceramic cooling gel in the first 2” of breathable open-cell foam and an additional 1” between the Nanocoils and individually-wrapped springs.

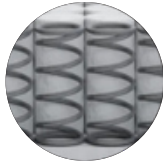

2. Micro Diamond memory foam

This 1” layer is infused with diamond particles designed to move heat away from the sleeper.

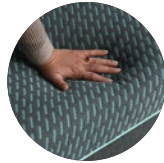

3. Nanocoils

Our 1” transition layer of Nanocoils provides personalized support.

4. Individually wrapped springs

6” of individually-wrapped springs prevent squeaks and feeling your partner’s every move.

5. Edge support

Increased density of perimeter springs provides excellent edge support making it easier to get in and out of bed.

**“This mattress is amazing!
It stays cool, and the combination
of foam and springs is perfect!”**
