

Fur Sweep Pet Steam Brush

What's in the box

- Pet Steam Brush
- USB-C Charging Cable
- Precision Water Bottle
- Factory User Manual

Gentle steam grooming for your pet

Keep your dog and cat's coat soft, smooth and shiny with a spa-like steam brush treatment your pet will love.

- **Charge the brush.** Connect the charging cable to the port on the underside of the handle. The red charging light will turn green when complete, after about 2-3 hours. A full charge provides up to two weeks of use. (**Note:** Do not charge the brush unattended for extended periods, such as overnight or for multiple days.)
- **Fill the water tank.** Unscrew the cap on the 40ml precision water bottle and fill with purified or distilled water. Remove the plastic plug on the top of the brush and fill the water tank using the nozzle to easily pour the water into the tank. (The tank holds about 30ml.)
- **Power up and brush.** Press the power button to create steam, then gently and slowly brush your pet's fur. The steam helps detangle and smooth the coat.
- **Clear the brush.** Use the large button on top of the brush to easily push pet hair off the bristles. Remove pet hair from the brush after every use.
- **Care for all your furry pets.** Works great for long & short hair pets to remove loose, tangled or knotted hair. Store in a cool, dry place.

How To Use Fur Sweep Steam Brush

1 Add water to the filling hole

2 Push the power button to turn on the steam release

3 Spray mist to keep fur smooth and manageable while brushing

4 One-Click Hair Removal
