

Smart Scene Music Lamps

Instruction

installation instructions

Basic parameters:

Control method: mobile APP/Controller

Working temperature: -20 degrees-+60 degrees

Power: 2.2W/PC

Power supply voltage: 5V (USB)

Cautions:

1. The maximum load of a single USB power cable is 10PCS hexagonal lights. Hexagonal lights exceeding the number will not work. If you need to connect more hexagonal lights, you have to add more USB power cables.

2. The hexagonal lights are cascaded in the direction of the arrow through the connector.

Applicable places: study rooms, living rooms, bedrooms, gyms, music bars, coffee shops and other home and commercial places.

Download App Software

Please search LED LAMP in major Appcenters, or scan below QR code.

1. Download the "LED LAMP" APP with your mobile phones by scanning the QR code on user manual or search the "LED LAMP" APP in iPhone APP store or Google play store.
2. After the APP are downloaded successfully, you need to turn on Bluetooth function on your phone firstly, then plug in the strip light, then open the APP, your APP will pair with the strip light automatically and you can control it.

☆ **Android phones need to open the location function and allow permission**

Unable to Connect Troubleshooting

- (1) Check if the power supply of the light strip is normal.
- (2) Check if the Bluetooth is turn on.
- (3) Check if there are other mobile phone are connected, Bluetooth 4.0 only support connections one to many, dose not support many to many.
- (4) Check APP Bluetooth setting if the phone is connected to the device, if connect, exit the APP and reopen, the APP will go to connect automatically.
- (5) Normal operations and can not connect, please exit the APP and reopen.
- (6) Exit APP, restart mobile phone, power on the strip light, reopen the APP, then them will connect automatically.

Instructions

Open the app, click the icon: LED DMX, and then enter the Bluetooth control interface.

 tutorial

1.  Settings: You can set rhythm, RGB sort, Adjust pixels code, timing, shake, change skin, rhythm can design your own color.

Set rhythm

Adjust pixels

Adjust pixels

The default factory pixel count of the APP is 130, i.e. 10PCS hexagon lights, the part beyond that will not work. When the number of pixels does not match the number of hexagon lights you have connected, you need to change the number of pixels, and the number of pixels should be increased by 13 for each additional PCS hexagon light.

2. 🌈 Color interface: The color interface has three parts: color ring, aisle and monochrome.
