AWARD-WINNING WATERING

With our legacy of award-winning and innovative products, Orbit is no stranger to the winner's circle. Now B-hyve smart timers are stealing the spotlight at industry events as well as earning accolades for innovation with our vendor partnerships.

A WATERING GENIUS

B-hyve is an ecosystem of smart technology products from Orbit – the leading retail watering brand in the US. B-hyve was launched in 2016 to make yard care smarter, water conservation easier, and outdoor living more enjoyable for homeowners everywhere.

Traditional Controller

Every Other Day Watering (April - October)	90 Watering Days
Average Water Used Per Watering	1,800 Gallons
Total Water Used	162,000 Gallons

Smart Watering Controller

Watering Adjusts Based on the Weather	47 Watering Days
Average Water Used Per Watering	1,800 Gallons
Total Water Used	84,600 Gallons

SMART CONTROL

B-hyve is Wi-Fi enabled, giving you complete control over your watering system from your phone, tablet, or computer.

SMARTER WATERING

B-hyve helps you water right by using WeatherSense™ technology that receives local weather data so it won't water in the rain. B-hyve delivers the exact amount of water your plants need, based on slope, soil type, sprinkler type, sun exposure, and more.

SMARTEST PRICES

At B-hyve, we believe your wallet shouldn't take a hit to conserve water. That's why we have the smartest prices that ensure you save water, time, and money!

Total Control

Control and monitor your watering from anywhere via Wi-Fi. Get detailed zone reports so you know when your timer has watered, for how long, and when it will water next.

Detailed Scheduling

Use smart watering, manual, or a combination of both. You're the boss. Watering restrictions? We've got you covered there too. Just tell the app when you can and cannot water, and B-hyve will take care of the rest.

Real-Time Updates

Get all the details on when your smart timer will water next. Be notified when watering completes, if a weather delay has been initiated, or if the controller has lost connection.

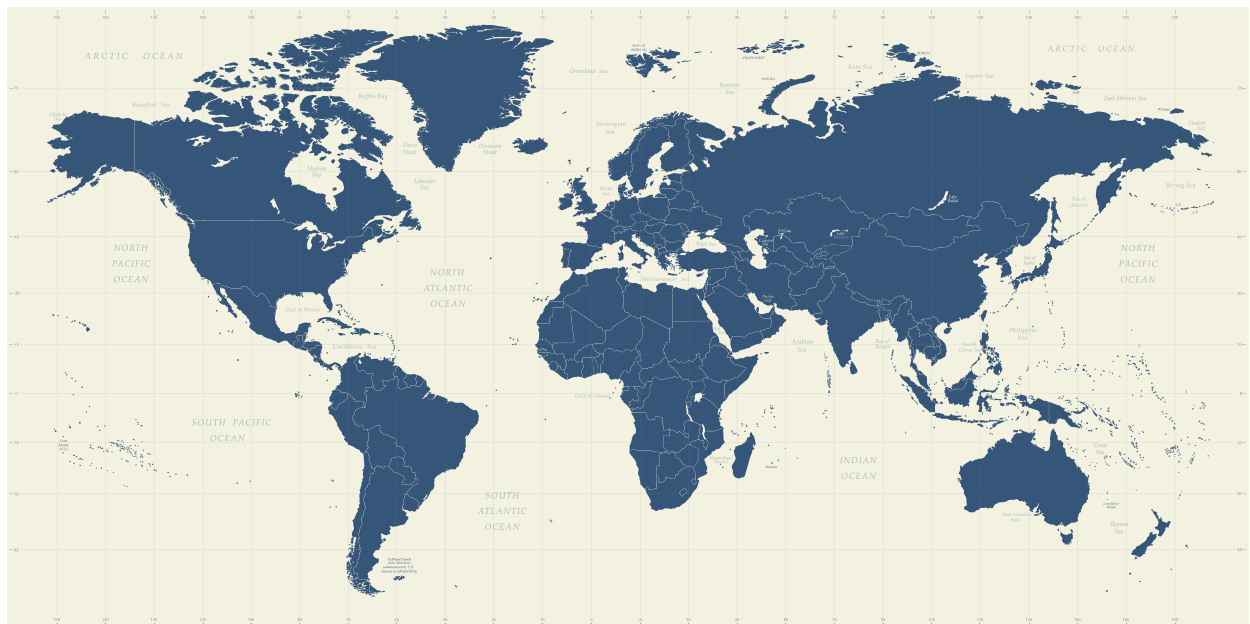

Smart Watering

Using WeatherSense technology, smart watering delivers the exact amount of water your plants need and won't water in the rain. Just enter your zone's unique details such as soil type, sprinkler type, and sun exposure.

B-HYVE AROUND THE WORLD

B-hyve is available on five continents and the app is currently available in the following languages: English, Spanish, Portuguese, Italian, French, German, and Polish.

FAQ'S

What is B-hyve?

B-hyve is an eco-system of smart technology products from Orbit – the leading retail brand for watering in the US. B-hyve was launched in 2016 to make water conservation and outdoor living easier and more fulfilling for all homeowners..

What is Smart watering?

Smart watering uses site data (zip code, soil type, vegetation type, slope, sun exposure, sprinkler head type) combined with current and forecast weather data to create the optimal watering schedule for any location.

Where are you located?

Our headquarters are located in North Salt Lake City, Utah.

Where can I buy your products?

You can buy our products at Home Depot, Lowes, Walmart, Amazon or your local retail store.

What do your products integrate with?

B-hyve works with Amazon Alexa, Google Home, and Apple Homekit is coming soon!

What differentiates you from your competitors?

At B-hyve, we believe saving water shouldn't be so expensive! That's why we sell our products at smarter prices than our competitors.

What rebates are available with these products?

Consumers may be eligible for a rebate of up to 100% of purchase price. Contact your local water provider to see if you qualify for a rebate in your area.

For rebate eligibility visit orbitonline.com/support/rebates

What do the certifications mean?

The EPA WaterSense and Smart Water Application Technologies (SWAT) certifications mean that B-hyve has met the EPA criteria for efficiency and performance and has been determined to be a water-efficient product.

What are catch cups?

Catch cups measure the application rate of water in your system to more accurately determine how long your sprinklers should run. This can easily save users an additional 20% in water use. B-hyve is the only smart sprinkler controller that integrates catch cup technology.

What if you have watering restrictions?

B-hyve lets you determine your watering schedule. Just choose the days and times your city allows you to water and you're good to go.

Is the timer an addition to my sprinkling system, or does it replace my old timer?

B-hyve will replace your old timer. B-hyve is easy to install and set up on the app. Just connect the wires from your old timer to your B-hyve timer, and create a program on the app or let the weather-based software create a program for you.

Can you add multiple timers to one account?

There is no limit to how many B-hyve timers can be connected per account. Each timer operates independently and still has its own zones and program settings, but you only need one account to manage them all.

What happens if my timer loses its Wi-Fi connection?

The timer will continue to run the week's program, but without Wi-Fi the smart watering will not be able to adjust accordingly.

“I couldn’t believe how easy and fast it was. Literally the whole process took minutes.”
