Frequently Asked Questions (FAQs)

Q : What could I do if the receiver did not respond to the operational signals from the remote control?

A :

1. Ensure the receiver is turned on.
2. Check your Remote, make sure the Receiver is in the correct channel.
3. Ensure the receiver is within the operating range and is not too far away enough power. If the indicator Light does not come on when any button is pressed on the Transmitter, ensure that the batteries are fully charged.
4. If did not resolve the problem, see page 8 to rematch them.

Q : What can I do if I press the remote control button, no pet does not react?

A :

1. Ensure the receiver is turned on.
2. It's possible that a low battery in the remote control and receiver is causing the problem. Ensure that the receiver is turned on when you train it.
3. The remote control distance can be affected by a variety of factors such as topography, weather, vegetation, and the transmission of other electronic devices.
4. Increase the electric shock or vibration's intensity level. Refer to "How to find the best Vibration/Shock Level" for more information.
5. Ensure that the receiver's electric shock-post contacts are close to the dog's skin.

- 19 -

Product Overview

Function description of the mode per adjustment

1.When you need to adjust the training intensity:

2.Press downward the gear adjustment button shortly,the beep/vibe mode will be switched. Press the mode button after 10 seconds to increase/decrease the gears.

3.Tap/Hold press downward the gear adjustment button,you will find the training intensity increase/decrease. If the training intensity does not change, it is not be directly work at this moment.The gear adjustment needs to be pressed downward first and then be able to rotate the button. It's to avoid the accidental touch and triggered accidentally.

- 18 -

5. Jumping on People.

Jumping can be an instinctive behavior that makes other people feel uneasy. Dogs usually leap to get attention, which is not a desirable trait in a pet dog. If you find a Receiver Trainer, you may take control of your dog's leaping action.

1.Let your dog sit before he can have any attention.

2.Ignore your dog when he jumps on you. Don't look at your dog's recognition level.

3.Don't pet your dog when he starts jumping on someone, press the stimulation button.

4.Don't look at your dog.

- Immediately release the stimulation button once your dog sits down.
- Praise your dog.

5.Repeat the procedure in several locations and use different people each time.

6.If your dog continues the stimulation, repeat the "ST" command several times before increasing the stimulation by one.

6. Digging up Garden Beds.

Now, your dog has acquired hours of your labor and money invested on the garden beds, but he digs them up anyway. Don't worry, the Receiver Trainer will help you to stop this behavior. It is out of 3 reasons, but more often than not, it is because of boredom.

If you offer a time, shaded location for your dog to be down and lots of water, digging will usually be the last thing on your dog's mind. However, some dogs are extremely strong-willed, , and utilizing an electric dog training collar may help resolve this issue. How to use it to stop your dog digging? Please follow the steps as follow:

1.Choose a stimulation level one step higher than your dog's recognition level.

2.Let your dog out in the yard.

3.Stay close to your dog and be in the area so you' dog does not associate digging with being alone.

- Stay on a spot where your dog cannot see you.
- Praise your dog for digging.

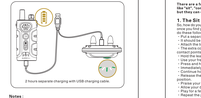

4.Watch for a few moments because your dog may start digging.

- Wait for a few moments because your dog may start digging.
- Wait for a few moments because your dog may start digging in a different location from the receiver trainer. Yes, the indicator light will turn on.

5. Make sure the charging port is dry before charging the device.

- 5 -

Charging Prior to Use

3 hours separate charging with USB charging.

Notes :

1. When the remote control is charging, the battery icon on the display will blink. When the battery is fully charged, the battery icon will stop flashing and displays a full status. If the remote control loses power, the battery icon will display empty and flash as a reminder.
2. While charging, the receiver's green LED status light will illuminate and flash in a breathing pattern. After fully charged, the green LED status light will stop breathing and remain on. While charging, the receiver will not function. Please refrain from receiving signals and being operated by the remote control. When the receiver is on, the indicator light will flash green.
3. Make sure the charging port is dry before charging the device.

- 6 -

Teach Basic Commands

There are a few new instructions that you may teach your dog: "SIT", "come", "stay", and "heel." these orders may seem simple, but they can definitely come in handy.

1. The Sit Command.

So, how do you teach the "SIT" command to your dog? It's pretty simple - Follow the steps as follow, and you'll be on the receive training infinity in no time following steps:

- Put your dog on a leash and call his name.
- It should be above the remote training (receiver) collar.
- Press the stimulation.
- The extra collar should not put pressure on the remote training collar's neck. Your dog will feel uncomfortable.
- Hold the leash and the Dog Remote Trainer on one hand.
- Hold the dog's leash in the other hand, keep the sitting position.
- Praise your dog for his attention.
- Immediately give the "SIT" command.
- Press the stimulation button.
- Release the stimulation button as soon as your dog is in the sitting position.
- Praise your do.
- Reward your dog for his desire from the sitting position.
- Play for a few moments.
- Repeat the process until your pet understands the command.

2. The Come Command.

Your dog will be more likely to follow your direction might be a critical step in training a remote dog training collar, this is how you educate your dog to follow your direction:

- Keep the leash and the Dog Remote Trainer on one hand.
- Hold the dog's leash in the other hand.
- Praise the dog for his attention.
- Immediately give the command "COME".
- Immediately press the command "COME".
- Release the stimulation button as soon as your dog obeys towards you.
- Praise your dog verbally or pet him.

- 7 -

1. Press the receiver's power switch button, the receiver is switched on, the LED indicator will flash once, while the receiver makes a tick sound.
2. To turn off the receiver, hold the power switch button again, the receiver is switched off, the LED indicator will flash again, while the receiver makes a tick sound twice.
3. The receiver will automatically turn off after 5 minutes.

Note :

After a period hours of inactivity, the receiver enters standby mode, and it must be activated by pressing the electric shock or vibration button on the receiver before it can be used to extend the life of the battery.

- 8 -

Teach Basic Commands

3. Training up Your Dog to Stay.

Now, your dog has learned to sit and come when called, it's time to teach him to stay. Here's how:

- Put your dog on a leash and call his name.
- It should be above the remote training (receiver) collar.
- Press the stimulation.
- The extra collar should not put pressure on the remote training collar's neck. Your dog will feel uncomfortable.
- Hold the leash and the Dog Remote Trainer on one hand.
- Hold the dog's leash in the other hand, keep the sitting position.
- Praise your dog for his attention.
- Immediately give the "STAY" command.
- Press the stimulation button.
- Release the stimulation button as soon as your dog is in the sitting position.
- Praise your do.
- Reward your dog for his desire from the sitting position.
- Play for a few moments.
- Repeat the process until your pet understands the command.

4. The Heel Command.

Now, good heel behavior is critical, as in keeping your dog near to you off-leash. Utilize an Electric Dog Training Collar to teach your dog to heel. Here's how:

- Shorten the leash so your dog can walk right beside you.
- Slowly release the leash.
- Press and hold down to press the stimulation button.
- Immediately give the command "HEEL".
- Use the leash to gently pull your dog back to make him understand the command.
- When your dog returns to your side, release the stimulation button.
- Praise your dog or give him food treats.
- If your dog continues to ignore the commands, it will be easier for you to reinforce positive behaviors.

Now, unpleasant behaviors such as jumping on people, digging in your yard, and pulling on the leash during walks become obedience training can also be corrected by using remote dog trainers.

- 9 -

Product Switching ON/OFF

1. To switch on the remote control, press and hold the ON/OFF Button on the remote's control's side for about 2 seconds.
2. To switch off the remote control, press and hold the ON/OFF Button in the OFF position.

- 10 -

7. Chasing Cars and People.

Dogs love to chase things, it's in their nature, especially if your dog enjoys going on runs or walks. Dogs adore chasing, don't they? Yes, , it is. Unfortunately, this can be dangerous.

Remote Dog Training can assist you in resolving this very dangerous habit. Here's how:

- Keep your dog on a leash.
- Make sure your dog understands and masters the "COME" command.
- Choose a stimulation level one step higher than your dog's recognition level.
- Let your dog chase a car.
- A loud noise or a car.
- Press and hold the stimulation button.
- Immediately give the command "COME".
- Make sure to hold the leash with a firm grip.
- Release the stimulation button as soon as your dog "COME" command.
- Praise your dog verbally or pet him. Provide him with food treats.
- Repeat the process until your dog will immediately give the "COME" command.

Now, you can be sure that your home food treats as soon as he returns to you. Remote Dog Training can help you to correct this behavior, but it is up to you to ensure that you are consistent. Remember, the more consistent you are, the more effective your Electric Dog Collar – no need for a physical fence. Your dog will learn to stay in your yard, and you will be able to enjoy a relaxing, enjoyable "walk" that securely confines your dog while protecting your property.

8. Excessive Barking (Quiet Command).

Obnoxious or nuisance dogs are quiet and excessive barking can be a real problem. Why does your dog excessively bark? There a few reasons:

- Bored.
- Trying to get attention.
- Because of other problems.

Remote Dog Trainer collars to reassure barking, you can use a Remote Training Collar to solve it. Here's how:

- Choose a stimulation level one step higher than your dog's recognition level.
- Let your dog bark excessively barks, press the stimulation button.
- Give the command "QUIET".
- Release the stimulation button to increase the stimulation level one step higher, if signal your dog bark like to bark.
- Praise your dog verbally or pet him. Provide him with food treats.
- Repeat the process until your dog will immediately give the "QUIET" command and he/she will not bark.

Remember, you can use some food treats as soon as he returns to you. Remote Dog Training can help you to correct this behavior, but it is up to you to ensure that you are consistent. Remember, the more consistent you are, the more effective your Electric Dog Collar – no need for a physical fence. Your dog will learn to stay in your yard, and you will be able to enjoy a relaxing, enjoyable "walk" that securely confines your dog while protecting your property.

- 11 -

Pairing the Remote Control and the Receiver

You may skip this step if the product is already matched up in the factory. (The paired channel is CH1.)

1. Turn on the remote control and press the CH button to choose "CH1".
2. Turn on a Receiver and press the power button of the Receiver by 2 seconds to enter pairing mode, the indicator light will flash green, the light is flashing.
3. Press and hold the remote control's beep button or the vibration button on the Remote control 10 seconds after the beep sound, hearing a beep sound signal that means the pairing successful.

Pairing Additional Receivers

You can select a different pairing channel to couple an extra receiver or two in the same manner as described above.

- 7 -

Finding the Most Appropriate Level of Electric Shock For your Dog

Now, you have your dog's training collar, it's time to find the most appropriate level for your dog. Remember, the goal is to find the lowest Ascertain that both the portable remote (transmitter) and the collar (receiver) on the dog are turned on.

1. Follow these steps to smoothly start training your puppy:

- Spend 10-15 minutes per day for 2-3 days helping your dog understand the collar.
- Associate the vibration and shock with a word and praise (use the tone as a warning).
- Keep the collar on for 2 seconds.
- Reward your dog with some treats.
- Allow 2-3 seconds before you repeat the process.
- Start with the lowest(1) level of stimulation. As soon as your dog starts to anticipate a reward with the tone, you're succeeded in this phase.

2. How to find a low-level Vibration/Shock Level – the level your dog is most comfortable with. Here are the steps:

- Start with the lowest(1) level of stimulation.
- Let your dog wear the collar for a few days.
- Look for a slight change in your dog's behavior.
- Look for a slight change in your dog's behavior.
- Something as his remote training collar.
- Increase the level.
- If you do not see any changes at his behaviour, move up to the next level of stimulation.
- Repeat the process your dog's reaction to the stimulation.
- Find the note of his recognition level – the level you use for communicating with your dog.

- 14 -

Test Training Modes

⚠ Warning

1. The metal probes is already installed on the collar. There are couples silicone probe covers in the box, the silicone protective cover can be applied to the probes to protect the dog's skin from shock or irritation.
2. Please remember to remove the silicone protective cover before putting it to the dog's hair, if the dog's hair is very long, just choose the dog's neck.

1. Test the electric shock function.

So, how do you test the "SHOCK" command to your dog? It's pretty simple - Follow the steps as follow, and you'll be on the receive training infinity in no time following steps:

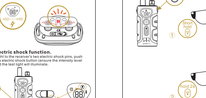

- Put your dog on a leash and call his name.
- It should be above the remote training (receiver) collar.
- Press the stimulation.
- The extra collar should not put pressure on the remote training collar's neck. Your dog will feel uncomfortable.
- Hold the leash and the Dog Remote Trainer on one hand.
- Hold the dog's leash in the other hand, keep the sitting position.
- Praise your dog for his attention.
- Immediately give the "SIT" command.
- Press the stimulation button.
- Release the stimulation button as soon as your dog is in the sitting position.
- Praise your do.
- Reward your dog for his desire from the sitting position.
- Play for a few moments.
- Repeat the process until your pet understands the command.

2. The Come Command.

Your dog will be more likely to follow your direction might be a critical step in training a remote dog training collar, this is how you educate your dog to follow your direction:

- Keep the leash and the Dog Remote Trainer on one hand.
- Hold the dog's leash in the other hand.
- Praise the dog for his attention.
- Immediately give the command "COME".
- Immediately press the command "COME".
- Release the stimulation button as soon as your dog obeys towards you.
- Praise your dog verbally or pet him.

- 8 -

8. Allow your dog to wear the electric training collar for a few days to a week before to beginning active training. This is to acquaint the beast in your dog that the collar is just like any other collar. He will prevent your dog from associating the collar with pain. Your dog will become impressed with the undesirable behavior and NOT with the remote training collar.
9. Start Out When Fitting the Electric Dog Collar! The pain on your dog's neck is frequently caused by over-tightening of the electric dog collar. This is a typical error made by the majority of dog owners. It show you're your dog's collar is too tight if you can't fit two fingers under the collar. To avoid these pressure injuries, you should allow the skin on your dog's neck to breathe.
10. Attaching a lead to the electronic dog collar will increase the collar's tightness, which we want to PREVENT. As your dog pulls against the lead, the collar will tighten around his neck. Instead, you should attach your dog's neck, eventually causing soreness. As a result, contact your dog's neck, eventually causing soreness. As a result, contact your vet's recommended collar for the best or to purchase a body leash or harness for your dog.

- 12 -

Test Training Modes

Tips :

1.Under the shock lock state, the shock function is unavailable.
2. The shock mode is always the last choice. Before using the shock mode, you can test by the Beep/Light/Vibration mode for your dog in case.
3. If you want to use the shock mode, please start from the low level.
4. If you want to use the shock mode, you can push the hard switch button to the shock symbol to turn off the shock mode.

- 13 -

FCC Warning

Please Follow these Important Training Guide while using the product to ensure your dog's safety and comfort!

WARNING denotes a potentially dangerous scenario that, if ignored, might result in the dog's death or serious injury.

1. Do not leave unattended while in use. Ensure that your dog's skin will have an adverse reaction to the device. If you are unsure, please consult a veterinarian before using this or any other trainer will be beneficial to your dog.
2. Do not attach the dog leashes to the training collar. Fit to your dog's neck according to the instructions in this booklet.
3. Use a separate collar for a lead, don't put pressure on the electronic collar.
4. Ensure that the collar is positioned so that the electrical contacts touch the dog without a safe range at all times and that you can easily draw the dog back if it escapes unexpectedly.
5. Do not use the collar on more than one dog. Before using the shock mode, you should first try the Beep/Light/Vibration mode for your dog in case.
6. Training start with the lowest level of stimulation.
7. Only use the training dog with food will usually contribute to the achievement of the best result.
8. Utilize verbal commands initially, and only when necessary, supplement with the remote training collar. Dogs can quickly understand verbal context by utilizing the same phrases each time. Try a word, work with your pet on a single habit at a time.
9. Do not overuse the collar, as it may lead to nonstop spoken orders. Avoid excessive corrections with your dog. For instance, by pushing the Beep Button, you may utilize the sounds as a warning. The dog will develop a negative association with the sound if you overuse it and will quickly learn to associate the beep with your spoken words.
10. Eliminate or teach one misbehavior or obedience order at a time. Dogs can become confused if you try to correct numerous behaviors at once.
11. Always keep an eye on the dog's reaction and make sure the training isn't too strenuous.
12. Keep the receiver and the collar away 1~2in. adjust the position and tightness if necessary to prevent excessive pressure.

This equipment has been tested and found to comply with the limits for a Class B digital device,pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation.
This equipment generates,uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 5cm between the radiator and your body.

Proper Fit of the Collar

1. Turn off the collar before to attaching it to your dog – this is to avoid accidental shocks. Ensure that the collar is positioned so that it contacts with your dog's skin with the behavior you are attempting to address.
2. Allow your dog to stand comfortably. DO NOT fit the collar while your dog is sitting down – your dog's neck is a bit smaller in standing position.
3. If your dog has thick fur, please use a comb to separate the fur around the neck before you put on the collar.
4. Place the Receiver around the neck of the dog. The collar should be tight, but the contact areas should feel comparable to how you would feel a necklace or watch – snug but not overly tight.
5. Put your dog's collar on, then change your thumb between the collar strap and the dog's neck. If one finger can be placed between, the fit is optimal.
6. The silicone caps may help to dull the static sensation. You should not use excessive force to push the collar against your dog's neck. Make sure that the metal contacts touch with the electrodes, since in some cases might cause pain in some dogs.
7. Allow your dog to become accustomed to the collar by allowing him to wear it for a few minutes.
8. Turn on the receiver (see page 15.
9. Turn on the collar to test it or begin training.
