FAQ:

1. Doesn't work

First of all, it is only convert HDMI to VGA, can't be used opposite way.

- ① Please try to set your monitor to VGA input source
- ② Please set the resolution of your HDMI input source DO NOT OVER the resolution of your VGA monitor maximum supported. This conveter max support 1080P
- ③ if try to change another cable

2. No Aduio

Suggestions:

2

① Due to the VGA port can't output audio indendently,so you have to connect the converter with a VGA monitor. If you don't need to play the monitor,you can turn your monitor off or switch it to HDMI model after you get your audio properly.

- ② Please set the audio Format on the source to PCM/LPCM
- ③ Please try to change another audio cable

3. Without Video

- ① It's only a HDMI to VGA Converter, only converter HDMI signal to VGA Signal and can't use opposite way
- ② Please try to set resolution on HDMI source to 1080p or lower
- ③ Please try to set your monitor to VGA input source
- ④ Change another cable to try it
- ⑤ Short out the bottom two connections on the VGA side to get audio to work.
