

ILLUMIBOWL INSTRUCTIONS

For video instructions, more information, questions or comments visit www.illumibowl.com

1. FIT TO TOILET

Adjust length of arm by pushing or pulling arm in back clip

2. INSTALL ILLUMIBOWL

Insert batteries, Moisten suction cups, and stick the Illumibowl to the outside of toilet. stick the LED light on the inside by reaching the arm to the inner rim of the toilet.

3. TURN OUT THE LIGHTS

illumibowl only works in the dark, when it detects movement it will turn on and stay on for 2 minutes after last movement. (If the lights are on the illumibowl will stay off saving the batteries for when you need them most.)

4. SET A COLOR OR LET THEM ROTATE

Set the button to the OUT position to cycle colors. press the button IN to SET to a single color when desired color is visible.

Note:

Your Illumibowl will work best if the sensor is facing the door. Some locations maybe better than others depending on bathroom layout. Adjust as needed.
