RAINTEN

DISCOVER RAIN TEN

Where luxury and sophistication merge flawlessly.

Crafted for the discerning gentleman radiating wealth and success, these exquisite watches showcase the allure of shimmering gold and the luxury of diamonds.

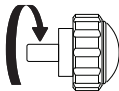

Each marker exudes nobility, allowing confidence and honor to radiate through the wrist.

Initial Watch Wearing

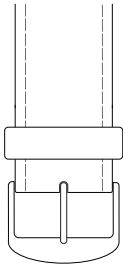

Before being worn for the first time, or if it has stopped, a RAINTEN watch must be wound manually in order to function correctly and precisely.

To wind a watch manually, rotate the crown clockwise 20-30 times to wind the watch successfully.

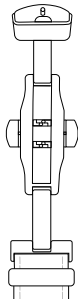

The watch will then be wound automatically as long as it is worn on the wrist.

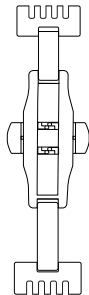

Strap Types

**Leather Strap with
Pin Buckle**

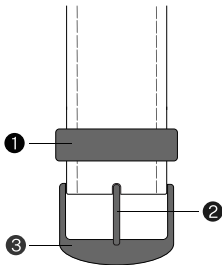

**Leather Strap with
Butterfly Clasp**

**Steel Strap with
Butterfly Clasp**

Leather Strap with Pin Buckle Overview

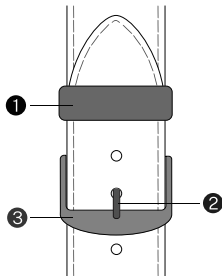

① leather loop

② Pointer

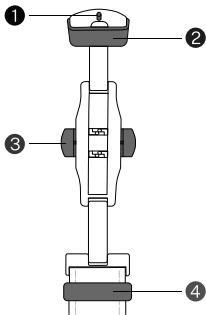

③ Pin buckle

Wearing a Leather Watch Strap with a Pin Buckle

Pass the watch strap through the pin buckle ③, align the pointer ② with the corresponding hole, and then insert the strap into the leather loop ① to secure it

Leather Strap with Butterfly Clasp Overview

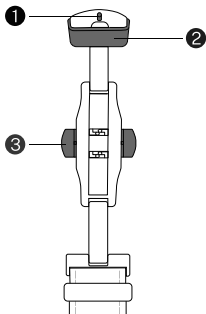

1 pin

2 hidden clasp

3 butterfly clasp

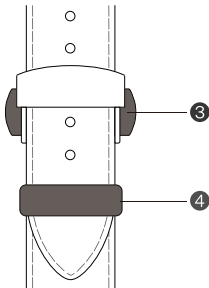

4 leather buckle

Wearing a Leather Strap with Butterfly Clasp

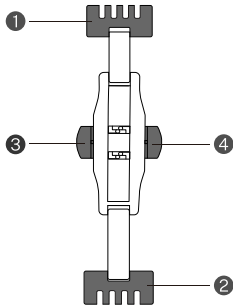

Lift the 'hidden' clasp ②, thread the leather strap through the opening to your desired size, snap the pin ① closed, then collapse the butterfly clasp ③ and lock it on your wrist for a perfect fit.

Unclip the Leather Strap with Butterfly Clasp

Unfasten the folding buckle ③ ,
unfasten the leather buckle ④ ,
and then take off the watch.

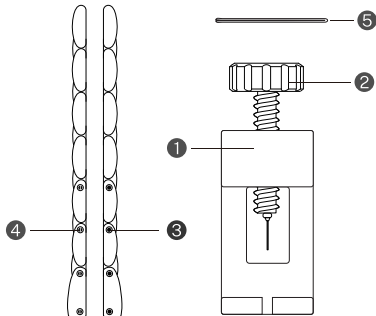

Steel Strap with Butterfly Clasp Overview

Combine ① and ② and press down firmly to secure.

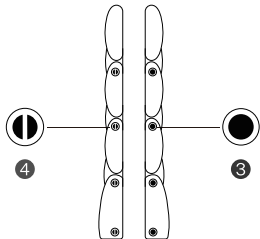

Press ③ and ④ simultaneously to release the band

Steel Strap Adjustment Tool Overview

- 1 Adjustment tool
- 2 Punch pin
- 3 Complete circle side
- 4 Recessed line within the circle side
- 5 Round end

How To Identify

Confirm the Length

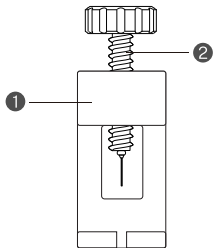

Compare the strap on your wrist to determine the needed adjustment length.

Identify the Pin Side

Observe the strap pins on both sides. One side is a complete circle ③, while the other has a recessed line within the circle ④.

Note: You need to look very carefully to see it.

How To Remove

Place the strap in the watch adjustment tool ① .

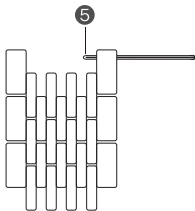

Align the complete circle ③ side with the punch pin ② .

Rotate the adjustment tool clockwise to push out the strap pin.

Remove the strap pin.

Repeat step 3 for the appropriate length.

How To Install

After adjusting, insert the round end ⑤ of the spring bar into the indented side ④.

Place it back into the adjustment tool.

Rotate the adjustment tool clockwise.

PRODUCT LINE CATALOG

R9001 Series

R9002 Series

RAINTEN R9001 Series

The green dial accentuates an unparalleled sense of fashion and allure, exuding a distinctive charm.

Embellished with a 999 gold motif, it radiates power and status, drawing attention effortlessly.

Complemented by diamond details, it epitomizes opulence, accentuating the wearer's prestigious status and refined taste.

CORE MATERIALS

White Diamonds

1 pcs of brilliant white diamond graces the 6 o'clock position, as a type of diamond, are uniquely composed of a single pure element, impart a unique sparkle and charm to the watch.

Cubic Zirconia

40 cubic zirconia stones surround the watch case, reflecting vibrant colors and shining brightly, highlighting its noble charm.

Synthesized Sapphire Glass Mirror

Adopting synthetic sapphire glass mirror, after high temperature production, cut and polished by diamond tool, it has excellent heat-resistant and anti-scratch characteristics to keep the mirror surface clean.

CORE MATERIALS

Stainless steel case

Selected high-quality stainless steel, the surface shows a bright color, highlighting its high corrosion and rust resistance characteristics.

Plated with 999 Real Gold

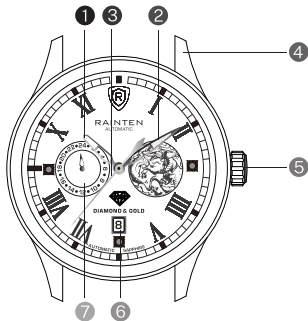

Involves coating the surface of the totem with 99.9% pure gold and showcasing exquisite carving techniques, thus exemplifying top-tier quality

Mechanical Movement

The mechanical movement of RAINTEEN watch is crafted from high-quality brass.

Its self-winding design harnesses the oscillation of the rotor to generate power, ensuring longevity, stability, and precision.

OVERVIEW OF THE WATCH

- ① Hour hand
- ② Minute hand
- ③ Seconds hand
- ④ Case
- ⑤ Crown
- ⑥ Calendar window
- ⑦ 24-hour subdial

WINDING

For first-time wear, manually wind the mechanical watch to ensure ample power and accurate timekeeping.

With the crown in position ①, rotate it clockwise for 20-30 turns to successfully wind the watch.

TIME SETTING

Refer to the 24-hour subdial to differentiate between AM and PM.

With the crown in position ③, rotate it clockwise or counterclockwise to set the correct time, aligning it with the 24-hour subdial.

Return the crown to position ① to finish setting the time.

CALENDAR SETTING

In position ②, turn the crown counterclockwise to adjust the date.

Return the crown to position ① to complete the date-setting process.

Note: It is advised not to set the date between 10 and 12 o'clock.

WATER RESISTANCE GUIDELINES

- ① After each use, carefully screw the crown onto the case to maintain water resistance.
- ② Align the crown and apply gentle pressure while screwing it clockwise.
- ③ Never unscrew the crown underwater.
- ④ Waterproof: It can repel sweat, accidental rain, and minor water splashes.
- ⑤ Avoid prolonged immersion, swimming, or bathing, as it may accelerate the aging of the waterproof rubber ring.

RAINTEN R9002 Series

A tiger head totem graces the surface.

At night, when the rolled gold tiger is awakened by shining a flashlight on it for over a minute, its eyes will glow green, and the tiger's true nature will emerge, radiating wild power and authority.

Note : The green glow signals the tiger's awakening; it is not for telling time.

CORE MATERIALS

White Diamonds

12 white diamonds adorn the dial, serving as time markers and adding a unique brilliance and charm to the watch.

Cubic Zirconia

30 cubic zirconia stones surround the watch case, reflecting vibrant colors and shining brightly, highlighting its noble charm.

Synthesized Sapphire Glass Mirror

Adopting synthetic sapphire glass mirror, after high temperature production, cut and polished by diamond tool, it has excellent heat-resistant and anti-scratch characteristics to keep the mirror surface clean.

CORE MATERIALS

Stainless steel case & band

Selected high-quality stainless steel, the surface shows a bright color, highlighting its high corrosion and rust resistance characteristics.

Rolled Gold

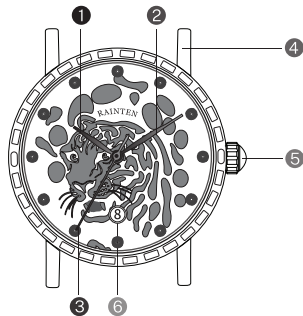

The tiger totem features a three-dimensional rolled gold technique, showcasing noble status and identity, displaying exquisite craftsmanship, and reflecting top-tier quality.

Mechanical Movement

The mechanical movement of RAIN TEN watch is crafted from high-quality brass.

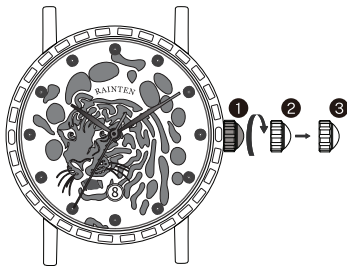

Its self-winding design harnesses the oscillation of the rotor to generate power, ensuring longevity, stability, and precision.
