

TWS-880

Wireless Binaural Bluetooth Headset

User's Manual

Safety Precautions

In order to use this product correctly and safely, please read this manual carefully before use and keep it.

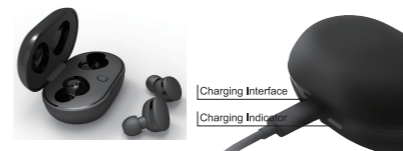

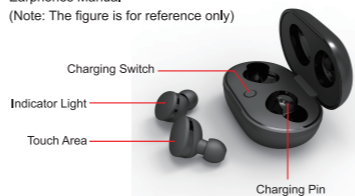

Pay attention to the followings when using your earphones:

1. Please control the volume and time when using the earphones.
2. Do not use earphones in potential hazard to ensure safety.
3. When driving, try to avoid using earphones to listen to music, and do not call or answer calls to avoid distraction.
4. Keep the earphones out of the reach of children to avoid the danger of improper use.
5. Try to avoid increasing the volume so that you don't hear the sound of your surrounding. If you have tinnitus or turn the volume too high, adjust to the appropriate volume.
6. If you feel obviously uncomfortable when using earphones, have irritating feeling or other adverse reactions, please stop using it immediately.
7. Avoid storing or using the earphones in an environment where the temperature is below -15°C (5°F) or above 55°C (131°F), otherwise the life span of the earphones of the battery life maybe affected.

Earphones Overview

Earphones Manual

(Note: The figure is for reference only)

Earphones Packing List:

- 1 * TWS-880 Earphones
- 1 * Manual
- 1 * Charging Cable
- 2 * Ear Caps (one pair in small size and one pair in big size)

Charging and Battery

1. For the first time use, please put the earphones into the charging case and connect the USB cable to charge. The charging time is about 2 hours. When the earphones is in the charging state, the red LED light will be on. If the light is not lit at this time, it means that the earphones are not in the right place. Please take it up and put it back again.
2. When the charging case is charging, there are four green LED lights on the charging case displaying the battery level. Each light represents 25% of the power. The green LED lights flash differently according to different battery levels. (For example, if the charging case is completely dead, the first green LED flashes when charging. When the power reaches a certain level, the first green LED is always on, and the second LED is blinking.) When the charging case is full of electricity, the four green LEDs are all on.
3. There is a built-in battery in charging case. When the charging case is fully charged, the earphones can be charged directly when the charging case is turned on, no need to connect USB. When the two earphones are fully charged, the battery display LED of charging case will automatically turn off within 1 minute.
4. Original charging cable must be used to charge the charging case. Using unsuitable charging cable may damage the earphones. The DC voltage must be 5V, and the current must be 1A (5V / 1A). Please do not use device over 5V / 1A or fast charged cable. The manufacturer is not responsible for the quality problems or safety problems arising from this.
5. The earphones contain a non-removable built-in charging cartridge battery. Do not attempt to remove the battery from the earphones to avoid damaging the earphones.

Power on

Open the charging case, take the earphones out of the charging case, it will turn on automatically (if the earphones are in the off state, you can long press the power button for about 3 seconds to start up). The earphones will emit a "Power On" tone.

Pairing the earphones to the phone

Step 1:

After you open the charging case and taking out the earphones, the two earphones will automatically pair after 3 seconds. After the two

earphones are successfully paired, the left ear will alternately flash red and blue; the right ear light will be off, and the two earphones will prompt "Teams Connected".

Step 2:

Take the two earphones out of the charging case, then turn on the Bluetooth function on your mobile phone to search for the Bluetooth device named "TWS-880" and click to pair. When the pairing is successful, the main earphone will prompt "Connected".

Tip: After the earphones are paired with your mobile phone for the first time, you can use it again without re-pairing. Turn on the Bluetooth earphones function of your mobile phone and take the earphones out of the charging case. The earphones will automatically turn on and automatically connect with the mobile phone. If you replace the mobile phone to connect with this product, please make sure that the phone having connected to this product has been disconnected from the Bluetooth device or the product has been factory reset.

How to restore factory settings

In the charging state (the earphones are in the charging box, the red light keeps being on), long press the left and right ears for 10 seconds at the same time. Wait until the indicator light flashes in blue for 3 times. Take out the earphones from the charging case, wait for 3 seconds for it to complete the pairing automatically.

Power off

Long press the multi-function key until the red light flashes and then turn off. The earphone will emit a "Power Off" tone, or put the earphone into the charging case and the earphones will be off and in the charging state.

Function

1. Answer the call: Click the left or right ear in the incoming call state.
2. Hang up the phone: Click the left or right ear while in the call.
3. Reject the call: Long press the left or right ear for 2 seconds in the incoming call state.
4. Redial the last number: Double click on the right ear to redial the last number of the call history.
5. Call Siri: Double click on the left ear to call Siri.
6. Previous song: Long press the right ear for 2 seconds while playing music, prompting "beep".

7. Next song: Long press the left ear for 2 seconds while playing music, prompting "beep".
8. Volume Plus: Three clicks on the right ear while playing music, prompting "beep".
9. Volume minus: three clicks on the left ear while playing music, prompting "beep".

Please wear the earphones in the correct way as the picture on the right.

Technical Specifications:

- * Bluetooth 5.0 specification, support BDR / EDR, support BLE
- * A Bluetooth headset that can play stereo music and has a binaural call function
- * Support automatic boot, automatic matching, automatic connection function
- * Support HFP1.7 HSP1.2 A2DP1.3 AVRCP1.6 SPP1.2 PBAP1.0
- * Receiving distance: > 10 meters
- * Working frequency: 2.402 GHz-2.480 GHz
- * Transmission power: 10 dbm
- * Audio support: SBC,AAC,mSBC,MP3,FLAC
- * Adjustment method: GFSK,TT / 4DQPSK,8DPSK
- * Signal to noise ratio: > 95db
- * Distortion: > 1%
- * Charging input voltage: DC5 ± 0.25V
- * Battery specification: 3.7V / 50mAh
- * Working voltage: 3.7 V (3.2 - 4.2 V)
- * Charge case battery: 600 mAh
- * Microphone sensitivity: -42 ± 3 db
- * Low voltage prompt: 3.3 V
- * Speaker specifications: Φ 6 mm, 1 6Ω
