

Self-adhesive Vinyl Instructions

Self-adhesive Vinyl is easy to use and perfect for creating personalized decorations. It sticks directly to smooth surfaces like greeting cards, scrapbooks, signs, phone cases, notebooks, cups, windows, and homeware, etc.

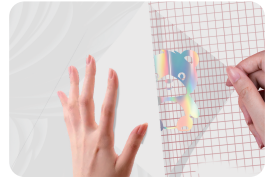

1. Instructions

01 Design and cut

02 Weed

03 Peel Transfer Tape away

04 Apply Transfer Tape and burnish

05 Done

① For better adhesion of the cut pattern,
use a burnishing tool such as a Scraper

2. Recommended Settings

Machine	Recommended Settings
Cricut Joy series, Cricut Explore series, and Cricut Maker series	Material:Vinyl Pressure:Default
Silhouette Cameo 4	Material:Vinyl Matte Blade:3 Force:6 Speed:5 Passes:2

Tip:Cut quality may vary depending on machine age and the degree of blade wear. Please ensure the blade is sharp and free of debris before cutting, and conduct a test cut with the recommended settings

3. Notice

01. The material is not suitable for inkjet, laser, or thermal printers
02. Cutting patterns with a line width under 2 mm is not recommended
03. Store in a cool, dry place away from direct sunlight

4. Useful Tips

4.1 How to Weed Quickly ?

01. Weed in a well-lit environment
02. For best results, weed directly on the cutting pad after cutting
03. Start by removing larger excess manually, before using a weeder for finer details. Gently press down on unweeded areas to prevent lifting the pattern edges

4.2 How to Enhance Adhesion ?

01. To ensure firm adhesion, apply the cut pattern to a clean, dry, smooth, and texture-free surface.
02. Wait 24 hours before washing the item to which the vinyl is applied.
